Education

Bowling Green State University — Bowling Green, OH
M.S. in Computer Science, GPA: 4.00/4.00 — *Aug. 2024 - Aug. 2026*

Bowling Green State University — Bowling Green, OH
B.S. in Computer Science, GPA: 4.00/4.00 — *Jan. 2021 - Apr. 2024*

Experience

Software Engineer — Jul. 2026 - Present
Actual Reality Technologies — *Perrysburg, OH*

- Integrated an internal LiteLLM AI gateway into IRIS (LibreChat fork with Node.js, React, MongoDB, Redis), enforcing multi-tier model routing, guardrails, and Langfuse tracing across production AI traffic.
- Built an automated evaluation pipeline with Node.js and Playwright to validate multi-turn IRIS reasoning, tool execution, and citation accuracy across 41+ regression test suites.
- Architected a production customer portal using Next.js 15, React 19, and Firebase, implementing multi-tenant session isolation, automated Plane API ticket reconciliation, and real-time client retainer tracking.

Artificial Intelligence Engineer Intern — May 2026 - Jul. 2026
SmartSolve Industries — *Bowling Green, OH*

- Architected a full-stack onboarding system with Next.js, TypeScript, PostgreSQL, and Drizzle ORM, implementing SSO authentication and RBAC middleware to streamline cross-department handoffs.
- Engineered domain-specific AI automation agents for enterprise workflows, benchmarking tooling viability and delivering production implementation roadmaps.
- Built containerized developer environments with Docker for WSL2 and macOS, standardizing local AI toolchains and isolating proprietary code during AI-assisted development.

Data Engineering Intern — May 2025 - Aug. 2025
American Association of Insurance Services — *Lisle, IL*

- Engineered automated ETL pipelines using Python, PySpark, and AWS Glue, processing 20+ TB of production insurance data across 700+ member companies for executive billing reporting.
- Led data profiling and schema migration across 160+ tables in MySQL, Oracle, and Impala using Python and SQL, standardizing legacy records into 25 unified master-data domains.

Software Engineering Intern — May 2023 - May 2024
American Association of Insurance Services — *Lisle, IL*

- Automated schema generation with Python to produce 1,000+ production SQL tables and analytical views across 10+ insurance lines, accelerating industry openIDL data standardization.
- Implemented RBAC and JWT authentication in a React/Node.js web application, securing sensitive data access across 110 enterprise users.

Software Engineering Intern — May 2022 - Aug. 2022
Alliance for Paired Kidney Donation — *Toledo, OH*

- Hardened AWS-hosted clinical match-run systems by implementing CSRF protection, IP-based audit logging, and input validation, eliminating runtime exceptions for organ transplant coordination.

Projects

FalconGraph Search - RAG Document Intelligence — Python, FastAPI, Next.js, FAISS, Sentence Transformers

- Built a source-grounded RAG search engine that crawled campus resources, processed PDF/DOCX/HTML documents, generated embeddings, retrieved with FAISS, and served cited answers via FastAPI and a Next.js interface.
- Implemented multithreaded C++/OpenMP web crawling, checkpointed document cleaning pipelines, and semantic ranking for source-grounded answer generation.

Fix-It-Flow - Multimodal AI Repair Assistant — Next.js, TypeScript, Gemini Vision, AWS DynamoDB

- Built a voice-first Next.js PWA using camera input, Web Speech API, Gemini Vision, and ElevenLabs TTS to diagnose appliance issues and guide hands-free repair workflows backed by AWS DynamoDB.
- Designed typed API routes for inspection sessions, device identification, and repair-step generation with structured findings, confidence scores, and safety warnings.

Technical Skills

Languages & Frameworks: Python, TypeScript/JavaScript, SQL, Java, C++, C, React, Next.js, Angular, Node.js, Express, FastAPI, REST APIs, Firebase

AI, Data & Cloud: LiteLLM, AI/model gateways, Model Context Protocol (MCP), guardrails, Langfuse, OpenAI API, Gemini API, Mistral AI, LangChain, RAG, LLM evaluation, PostgreSQL, MySQL, MongoDB, AWS Glue, S3, Lambda, IAM, DynamoDB, PySpark, Redis

Security, Testing & Tools: Vercel, Vitest, Jest, Playwright, Testing Library, Docker, Git, Linux, SSO, JWT, RBAC, Auth0, anti-CSRF, audit logging, PII tokenization, Codex, Claude Code
