github.com/aryanmiriyala | Software Engineer

Education

Bowling Green State University — Bowling Green, OH
M.S. in Computer Science, GPA: 4.00/4.00 — *Aug. 2024 - Aug. 2026*

Bowling Green State University — Bowling Green, OH
B.S. in Computer Science, GPA: 4.00/4.00 — *Jan. 2021 - Apr. 2024*

Experience

Software Engineer — Oct. 2026 - Present
Actual Reality Technologies (Intern: Jul. 2026 – Sep. 2026) — *Perrysburg, OH*

- Built an automated validation gate runner with Node.js and headless Chrome (Playwright) to evaluate multi-turn LLM responses, tool calls, and citations across 41+ test cases for the NOIC glass-research AI system.
- Revamped and wrapped up the customer portal end-to-end across 1,476 commits, delivering two-way Plane ticket sync, retainer tracking, remote MCP tools, and multi-tenant auth in Next.js 15 and Firebase.

Artificial Intelligence & Computer Science Intern — May 2026 - Jul. 2026
SmartSolve Industries — *Bowling Green, OH*

- Deployed role-specific AI agents for employee-requested workflows and converted tool audits into scoped projects, helping operations and executive leaders prioritize internal AI investments.
- Architected a full-stack onboarding tracker with Next.js, TypeScript, PostgreSQL, Drizzle ORM, SSO, and auth middleware, replacing memory-based HR follow-up with secure new-hire handoff tracking.
- Modeled an AI-enabled QMS dependency register to make quality-document relationships traceable before process changes, reviews, and downstream implementation work.

Data Engineering Intern — May 2025 - Aug. 2025
American Association of Insurance Services — *Lisle, IL*

- Automated a weekly DBeaver SQL billing process with Python, PySpark, and AWS Glue, processing 20+ TB of production insurance data for Data Solutions, internal teams, and CFO reporting.
- Architected a 160+ table MDM migration by profiling MySQL, Oracle, and Impala sources with Python, Pandas, SQL, and JDBC, standardizing inconsistent legacy insurance data into 25 domains.
- Modernized 160+ legacy Pentaho jobs into AWS Glue ETL workflows and partitioned S3 pipelines for Semarchy MDM, reducing job sprawl for governed MDM ingestion.
- Delivered reverse-ETL and data-validation workflows with custom AWS IAM roles, giving users controlled self-service access to validated insurance data while maintaining 24-hour latency.

Software Engineering Intern — May 2023 - May 2024
American Association of Insurance Services — *Lisle, IL*

- Engineered Python/JSON automation that generated 1,000+ production SQL tables and consolidated views across 10+ insurance lines, accelerating openIDL/openIDS-aligned data standardization and reporting.
- Automated CSV cleaning and deduplication with Python, Pandas, multiprocessing, fuzzy matching, and hashing, improving source quality before insurance data standardization.
- Implemented RBAC and JWT patterns in a React/Node.js modernization, replacing broad employee-wide visibility with role-specific controls for about 110 internal users.
- Automated AWS Lambda validation that tokenized PII with hashlib/boto3 and delivered structured JSON to S3, supporting safer downstream insurance data processing for SDMA workflows.

Software Engineering Intern — May 2022 - Aug. 2022
Alliance for Paired Kidney Donation — *Toledo, OH*

- Secured AWS-hosted Lucee/CFML match-run workflows with anti-CSRF, IP-aware audit logging, protected routing, crash fixes, and blood-tube defaults for safer transplant operations.

Projects

Diff-Grounded PR Description Generation — Python, OpenAI API, GitHub API

- Developed an ICSME-published LLM pipeline turning commits, diffs, and repo metadata into evidence-grounded PR descriptions, reducing reviewer effort across 1,450 PRs.

Technical Skills

Languages & Frameworks: Python, TypeScript/JavaScript, Swift, SQL, Java, C++, C, C#, React, Next.js, Angular, Node.js, Express, REST APIs, Firebase

AI, Data & Cloud: LiteLLM, AI/model gateways, smart-router tiers, guardrails, Langfuse, Model Context Protocol (MCP), OpenAI API, Gemini API, Mistral AI, LangChain, RAG, LLM evaluation, PostgreSQL, MySQL, MongoDB, AWS Glue, S3, Lambda, IAM, DynamoDB, PySpark

Security, Testing & Tools: Vercel, Vitest, Jest, Playwright, Testing Library, Docker, Git, Linux, SSO, JWT, RBAC, Auth0, anti-CSRF, audit logging, PII tokenization, Codex, Claude Code
