Education

Bowling Green State University — Bowling Green, OH
M.S. in Computer Science, GPA: 4.00/4.00 — *Aug. 2024 - Aug. 2026*

Bowling Green State University — Bowling Green, OH
B.S. in Computer Science, GPA: 4.00/4.00 — *Jan. 2021 - Apr. 2024*

Experience

Software Engineer — Jul. 2026 - Present
Actual Reality Technologies — *Perrysburg, OH*

- Architected IRIS, an enterprise AI platform on a LibreChat fork (Node.js, React, MongoDB), integrating an internal LiteLLM gateway with multi-tier routing, guardrails, and Langfuse tracing across production AI traffic.
- Built an automated evaluation pipeline with Node.js and Playwright to validate multi-turn reasoning, tool execution, and citation accuracy across 41+ regression test suites with CI/CD gates.
- Architected a production client portal using Next.js 15, React 19, and Firebase, implementing multi-tenant session isolation, automated ticket triage via Plane API two-way sync, and real-time client retainer tracking.

Artificial Intelligence Engineer Intern — May 2026 - Jul. 2026
SmartSolve Industries — *Bowling Green, OH*

- Architected a full-stack onboarding system with Next.js, TypeScript, PostgreSQL, and Drizzle ORM, implementing SSO authentication and RBAC middleware to streamline cross-department handoffs.
- Built a cross-platform Docker devcontainer for WSL2 and Colima, isolating AI-assisted development workflows to safeguard proprietary source code and standardizing local toolchains.

Data Engineering Intern — May 2025 - Aug. 2025
American Association of Insurance Services — *Lisle, IL*

- Engineered automated ETL pipelines using Python, PySpark, and AWS Glue, processing 20+ TB of production insurance data across 700+ member companies for executive billing reporting.
- Led data profiling and schema migration across 160+ tables in MySQL, Oracle, and Impala using Python and SQL, standardizing legacy records into 25 unified master-data domains.
- Modernized 160+ legacy Pentaho ETL jobs into serverless AWS Glue workflows and partitioned S3 data lakes, consolidating pipeline complexity and guaranteeing 24-hour SLA data freshness.

Software Engineering Intern — May 2023 - May 2024
American Association of Insurance Services — *Lisle, IL*

- Automated schema generation with Python to produce 1,000+ production SQL tables and views across 10+ insurance lines, accelerating industry openIDL data standardization.
- Implemented RBAC and JWT authentication in a React/Node.js web application, securing sensitive data access across 110 enterprise users.
- Engineered Spring Boot microservice APIs on OpenShift with Maven, delivering cloud-based microservice patterns for insurance data platforms.

Software Engineering Intern — May 2022 - Aug. 2022
Alliance for Paired Kidney Donation — *Toledo, OH*

- Hardened AWS-hosted Lucee/CFML clinical match-run systems by implementing CSRF protection, IP-based audit logging, and input validation, eliminating runtime exceptions for organ transplant coordination.

Projects

Fix-It-Flow - Multimodal AI Repair Assistant — Next.js, TypeScript, Gemini Vision, AWS DynamoDB

- Built a multimodal PWA with Next.js, Web Speech API, Gemini Vision, and ElevenLabs TTS, enabling real-time audio-visual equipment diagnostics backed by AWS DynamoDB.

Diff-Grounded PR Description Generation — Python, OpenAI API, GitHub API

- Engineered an LLM summarization pipeline (Python, OpenAI API) accepted at IEEE ICSME, synthesizing code diffs and repository metadata into structured PR descriptions across 1,450 pull requests.

Technical Skills

Languages: C#, Python, SQL, Java, TypeScript/JavaScript, Swift
Backend & Databases: .NET Core (Spring Boot adjacent), REST APIs, Node.js, Express, SQL Server/T-SQL (MySQL, Oracle, PostgreSQL adjacent), PostgreSQL, MongoDB, Firebase/Firestore
Cloud, DevOps, AI & Security: AWS Glue, S3, Lambda, IAM, DynamoDB, Pub/Sub (SSE, WebSocket, Plane API), Docker, Git, CI/CD, Agile/Scrum, LiteLLM, AI/model gateways, guardrails, Langfuse, MCP, Playwright, Vitest, Jest, SSO, JWT, RBAC, Auth0, anti-CSRF, audit logging, PII tokenization
Data Engineering: PySpark, AWS Glue Workflows, Apache NiFi, Kafka, HDFS, Impala, Oracle, MySQL, PostgreSQL, Semarchy MDM, ETL, Reverse ETL, Data validation, Data profiling, Partitioned S3 pipelines
