PROFESSIONAL SUMMARY

Early-Career Software Engineer - AI Applications-aligned engineer with Python, REST API, LLM/RAG, Docker, Git, and cloud experience across FastAPI search, Next.js/Express apps, and AWS data pipelines.

EDUCATION

Bowling Green State University

M.S. in Computer Science, GPA: 4.00/4.00

Bowling Green, OH

Aug. 2024 – Aug. 2026

Bowling Green State University

B.S. in Computer Science, GPA: 4.00/4.00

Bowling Green, OH

Jan. 2021 – Apr. 2024

EXPERIENCE

Artificial Intelligence & Computer Science Intern

May 2026 – Present

SmartSolve Industries

Bowling Green, OH

- Applied Codex and Claude Code to implementation planning, debugging, code review, and self-review while validating generated output around proprietary internal software.
- Architected a full-stack Next.js onboarding tracker with TypeScript, PostgreSQL, Drizzle ORM, SSO, and auth middleware, centralizing new-hire workflows while protecting sensitive employee data.
- Built a cross-platform Docker devcontainer for WSL2 and Colima, standardizing setup and isolating AI-assisted development workflows around company source code.
- Scoped an AI-enabled QMS dependency register by modeling relationships among quality documents, translating ambiguous operational requirements into a reviewable implementation plan.

Data Engineering Intern

May 2025 – Aug. 2025

American Association of Insurance Services

Lisle, IL

- Automated a manual SQL billing workflow with Python, PySpark, and AWS Glue, processing 20+ TB of production insurance data to calculate charges for 700+ member companies.
- Profiled 160+ MySQL, Oracle, and Impala tables with Python, Pandas, SQL, and JDBC, mapping source-system relationships into a 25-domain taxonomy for maintainable migration.
- Built reverse-ETL and data-validation workflows with AWS IAM access controls and S3 pipelines, supporting controlled self-service data access and 24-hour data latency.

Software Engineering Intern

May 2023 – May 2024

American Association of Insurance Services

Lisle, IL

- Engineered Python/JSON backend automation that generated 1,000+ production SQL tables across MySQL, Oracle, PostgreSQL, and 10+ insurance lines.
- Implemented RBAC and JWT patterns in a React/Node.js modernization, replacing broad application access with role-specific controls for approximately 110 internal users.
- Automated AWS Lambda validation that tokenized PII with hashlib/boto3 and delivered structured JSON to S3, strengthening secure downstream data processing.

Software Engineering Intern

May 2022 – Aug. 2022

Alliance for Paired Kidney Donation

Toledo, OH

- Secured and stabilized an AWS-hosted Lucee/CFML healthcare platform with anti-CSRF protection, IP-aware audit logging, protected routing, import-ordering fixes, and duplicate-antigen crash handling.

PROJECTS

FalconGraph Search - Source-Grounded Campus RAG

Python, FastAPI, FAISS, OpenAI API

- Built a BGSU answer engine combining C++/OpenMP crawling, Python document processing, embeddings, FAISS retrieval, FastAPI RAG, and a Next.js interface for cited source tracing.

Diff-Grounded PR Description Generation

Python, OpenAI API, GitHub API

- Built an ICSME-published LLM pipeline that generated evidence-grounded pull request descriptions from commits, diffs, linked issues, and repository metadata, then evaluated outputs against code-change evidence.

RocketGrader - AI Assignment Feedback Platform

Angular, TypeScript, Express, MongoDB

- Built a full-stack AI feedback platform with REST APIs, MongoDB/Mongoose models, Auth0, AWS S3 upload/parsing, and LangChain/Mistral AI grading workflows for teacher/student dashboards.

TECHNICAL SKILLS

Languages, APIs & AI: Python, TypeScript/JavaScript, SQL, C++, REST APIs, OOP, algorithms, data structures, OpenAI API, Gemini API, Mistral AI, LangChain, RAG, embeddings, vector search, FAISS, ChromaDB, prompt engineering, LLM evaluation

Cloud, Data & Tools: AWS Glue, S3, Lambda, IAM, DynamoDB, PySpark, Pandas, PostgreSQL, MySQL, MongoDB, Oracle, Docker, Git, Linux, Codex, Claude Code

Web & Security: React, Next.js, Angular, Node.js, Express, FastAPI, Auth0, SSO, JWT, RBAC, auth middleware, anti-CSRF, audit logging
