EDUCATION

Bowling Green State University

M.S. in Computer Science, GPA: 4.00/4.00

Bowling Green, OH

Aug. 2024 – Aug. 2026

Bowling Green State University

B.S. in Computer Science, GPA: 4.00/4.00

Bowling Green, OH

Jan. 2021 – Apr. 2024

EXPERIENCE

Software Engineering Intern

Jul. 2026 – Present

Actual Reality Technologies

Perrysburg, OH

- Built a LiteLLM-based AI Gateway with smart-router tiers, guardrails, Langfuse tracing, Slack block alerts, CI gates, and 44 red-team fixtures for testable model-call routing.
- Improving a private Next.js/TypeScript customer portal with Firebase, project-management API integration, auth/session flows, dashboard logic, health checks, and Vitest-covered customer/admin workflows.

Artificial Intelligence & Computer Science Intern

May 2026 – Jul. 2026

SmartSolve Industries

Bowling Green, OH

- Supported a phased AI integration roadmap by auditing AI-tool workflow gaps, translating department needs into candidate AI capstone projects, and evaluating LLM/API/cloud automation paths.
- Architected a full-stack onboarding tracker with Next.js, TypeScript, PostgreSQL, Drizzle ORM, SSO, and auth middleware, centralizing new-hire workflows while protecting sensitive employee data.
- Scoped an AI-enabled QMS dependency register by modeling relationships among quality-management documents, translating ambiguous operational needs into a reviewable implementation plan.

Data Engineering Intern

May 2025 – Aug. 2025

American Association of Insurance Services

Lisle, IL

- Automated a manual SQL billing workflow with Python, PySpark, and AWS Glue, processing 20+ TB of production insurance data to calculate charges for 700+ member companies.
- Profiled 160+ MySQL, Oracle, and Impala tables with Python, Pandas, SQL, and JDBC, mapping source-system relationships into a 25-domain taxonomy for maintainable migration.
- Replaced 160+ legacy Pentaho jobs with AWS Glue ETL workflows and partitioned S3 pipelines for Semarchy MDM, improving maintainability and standardizing cloud data movement.
- Built reverse-ETL and data-validation workflows with custom AWS IAM roles, supporting controlled self-service access, reduced manual entry, and 24-hour data latency.

Software Engineering Intern

May 2023 – May 2024

American Association of Insurance Services

Lisle, IL

- Engineered Python/JSON automation that generated 1,000+ production SQL tables across MySQL, Oracle, PostgreSQL, and 10+ insurance lines, scaling standardized data-model delivery.
- Built Python data-processing workflows with Pandas, multiprocessing, fuzzy matching, and hashing to clean large CSV datasets and support insurance standardization pipelines.
- Implemented RBAC and JWT patterns in a React/Node.js modernization, replacing broad internal access with role-specific controls for about 110 users.
- Automated AWS Lambda validation that tokenized PII with hashlib/boto3 and delivered structured JSON to S3, strengthening secure downstream data processing.

Software Engineering Intern

May 2022 – Aug. 2022

Alliance for Paired Kidney Donation

Toledo, OH

- Stabilized an AWS-hosted Lucee/CFML healthcare platform with anti-CSRF protection, IP-aware audit logging, access routing, import-ordering fixes, data-entry safeguards, and duplicate-antigen crash handling.

PROJECT

Diff-Grounded PR Description Generation

Python, OpenAI API, GitHub API

- Built an ICSME-published LLM pipeline that generated evidence-grounded pull request descriptions from commits, diffs, linked issues, and repository metadata, then evaluated outputs against raw code-change evidence.
- Built an automated LLM evaluation workflow that compared generated PR descriptions against raw code-change evidence, outperforming AIDev and PRSummarizer baselines.

TECHNICAL SKILLS

Languages & Product: Python, TypeScript/JavaScript, SQL, C++, C, C#, React, Next.js, Angular, Node.js, Express, REST APIs, Firebase

AI, Data & Cloud: LiteLLM, AI/model gateways, smart-router tiers, guardrails, Langfuse, OpenAI API, Gemini API, Mistral AI, LangChain, RAG, LLM evaluation, PostgreSQL, MySQL, MongoDB, AWS Glue, S3, Lambda, IAM, DynamoDB, PySpark

Security, Testing & Tools: Vercel, Vitest, Testing Library, Docker, Git, Linux, SSO, JWT, RBAC, Auth0, anti-CSRF, audit logging, PII tokenization, Codex, Claude Code
