PROFESSIONAL SUMMARY

Software Engineer I aligned full-stack engineer with TypeScript, JavaScript, React, Node.js, cloud data, and secure workflow experience, focused on responsive applications, data pipelines, and telemetry-backed systems.

EDUCATION

Bowling Green State University

M.S. in Computer Science, GPA: 4.00/4.00

Bowling Green, OH

Aug. 2024 – Aug. 2026

Bowling Green State University

B.S. in Computer Science, GPA: 4.00/4.00

Bowling Green, OH

Jan. 2021 – Apr. 2024

EXPERIENCE

Artificial Intelligence & Computer Science Intern

May 2026 – Present

SmartSolve Industries

Bowling Green, OH

- Architected a full-stack onboarding tracker with Next.js, TypeScript, PostgreSQL, Drizzle ORM, SSO, and auth middleware, centralizing new-hire workflows while protecting sensitive employee data.
- Scoped an AI-enabled QMS dependency register by modeling relationships among quality-management documents, translating ambiguous operational needs into a reviewable implementation plan.
- Built a Docker devcontainer for WSL2 and Colima, standardizing cross-platform setup and isolating AI-assisted development workflows around proprietary source code.

Data Engineering Intern

May 2025 – Aug. 2025

American Association of Insurance Services

Lisle, IL

- Automated a manual SQL billing workflow with Python, PySpark, and AWS Glue, processing 20+ TB of production insurance data to calculate charges for 700+ member companies.
- Profiled 160+ MySQL, Oracle, and Impala tables with Python, Pandas, SQL, and JDBC, mapping source-system relationships into a 25-domain taxonomy for maintainable migration.
- Replaced 160+ legacy Pentaho jobs with AWS Glue ETL workflows and partitioned S3 pipelines for Semarchy MDM, improving maintainability and standardizing cloud data movement.

Software Engineering Intern

May 2023 – May 2024

American Association of Insurance Services

Lisle, IL

- Engineered Python/JSON automation that generated 1,000+ production SQL tables across MySQL, Oracle, PostgreSQL, and 10+ insurance lines, scaling standardized data-model delivery.
- Implemented RBAC and JWT patterns in a React/Node.js modernization, replacing broad internal access with role-specific controls for about 110 users.
- Automated AWS Lambda validation that tokenized PII with hashlib/boto3 and delivered structured JSON to S3, strengthening secure downstream data processing.

Software Engineering Intern

May 2022 – Aug. 2022

Alliance for Paired Kidney Donation

Toledo, OH

- Secured an AWS-hosted Lucee/CFML healthcare workflow platform with anti-CSRF protection, IP-aware audit logging, and protected access-denied/404 routing across internal workflows.
- Modernized legacy workflow UI with HTML5 date/time inputs, JavaScript/CSS fallbacks, reusable modal/tab components, and operational reliability fixes.

PROJECTS

Fix-It-Flow - Voice-First Repair PWA

Next.js, TypeScript, Gemini, DynamoDB

- Built a stateful AI workflow with typed Next.js API routes, camera input, voice commands, Gemini Vision, ElevenLabs TTS, and DynamoDB persistence.

Travel Health Advisor

React, Vite, Express, MongoDB

- Implemented an interactive React map that retrieved country disease records from an Express/MongoDB API and surfaced risk, vaccine availability, healthcare access, and recovery-rate data.

DreamScape - Mobile Learning App

React Native, Expo, TypeScript

- Built a local-first React Native/Expo app with generated quizzes, text-to-speech learning cues, audio caching, cue scheduling, session tracking, and typed persistence stores.

Self-Adaptive Parallelism

C++, OpenMP, Python, Docker

- Built a C++/OpenMP runtime research system that recorded per-epoch telemetry and used a UCB controller to tune scheduling policy, chunk size, and thread count.

TECHNICAL SKILLS

Languages & Frontend: TypeScript/JavaScript, Python, SQL, C++, React, React Native, Next.js, Angular, Vite, HTML5/CSS

Backend, Cloud, Data & Security: Node.js, Express, REST APIs, PostgreSQL, MySQL, MongoDB, AWS Glue, S3, Lambda, IAM, DynamoDB, PySpark, Docker, Git, SSO, JWT, RBAC, Auth0, data validation
