PROFESSIONAL SUMMARY

Software engineer aligned with Full Stack Engineer, New Grad responsibilities through TypeScript/Next.js, Node/Express, Postgres, internal tools, AI model orchestration, and production-minded automation.

EDUCATION

Bowling Green State University

M.S. in Computer Science, GPA: 4.00/4.00

Bowling Green, OH

Aug. 2024 – Aug. 2026

Bowling Green State University

B.S. in Computer Science, GPA: 4.00/4.00

Bowling Green, OH

Jan. 2021 – Apr. 2024

EXPERIENCE

Artificial Intelligence & Computer Science Intern

May 2026 – Present

SmartSolve Industries

Bowling Green, OH

- Architected a full-stack Next.js onboarding tracker with TypeScript, PostgreSQL, Drizzle ORM, SSO, and auth middleware, centralizing new-hire workflows while protecting sensitive employee data.
- Scoped an AI-enabled QMS dependency register by modeling relationships among quality-management documents, translating ambiguous operational requirements into a reviewable implementation plan.
- Applied Codex and Claude Code to implementation planning, debugging, code review, and self-review while validating generated output around proprietary internal software.
- Built a cross-platform Docker devcontainer for WSL2 and Colima, standardizing setup and isolating AI-assisted development workflows around company source code.

Data Engineering Intern

May 2025 – Aug. 2025

American Association of Insurance Services

Lisle, IL

- Automated a manual SQL billing workflow with Python, PySpark, and AWS Glue, processing 20+ TB of production insurance data to calculate charges for 700+ member companies.
- Profiled 160+ MySQL, Oracle, and Impala tables with Python, Pandas, SQL, and JDBC, mapping source-system relationships into a 25-domain taxonomy for maintainable migration.
- Built reverse-ETL and data-validation workflows with AWS IAM access controls and S3 pipelines, supporting controlled self-service data access and 24-hour data latency.

Software Engineering Intern

May 2023 – May 2024

American Association of Insurance Services

Lisle, IL

- Engineered Python/JSON backend automation that generated 1,000+ production SQL tables across MySQL, Oracle, PostgreSQL, and 10+ insurance lines.
- Implemented RBAC and JWT patterns in a React/Node.js modernization, replacing broad application access with role-specific controls for approximately 110 internal users.
- Automated AWS Lambda validation that tokenized PII with hashlib/boto3 and delivered structured JSON to S3, strengthening secure downstream data processing.

Software Engineering Intern

May 2022 – Aug. 2022

Alliance for Paired Kidney Donation

Toledo, OH

- Modernized legacy ColdFusion forms with HTML5 date/time inputs, themed CSS, JavaScript fallbacks, and eform updates, improving data-entry reliability and graceful degradation for clinical workflows.

PROJECTS

Fix-It-Flow - Voice-First AI Repair PWA

Next.js, TypeScript, Gemini, DynamoDB

- Built typed Next.js API routes and AWS-backed session persistence for inspection turns, repair sessions, device identification, text-to-speech, chat, uploads, findings, frames, and repair steps.
- Implemented model orchestration across camera input, voice commands, Gemini Vision, Featherless.AI/Llama reasoning, ElevenLabs TTS, and structured repair-first recommendations.

AI Project Management Tool - Execution Planning Prototype

Next.js, TypeScript

- Built a Next.js 15/TypeScript prototype that transformed project briefs into reviewable task plans and displayed skills, risks, statuses, and explainable owner recommendations.

Career Ops - Application Automation System

Python, APIs, LaTeX, Git

- Designed separate job-discovery and application-generation pipelines with structured ATS ingestion, targeted LaTeX artifacts, tracker updates, validation gates, and human approval boundaries.

TECHNICAL SKILLS

Full Stack & Product: TypeScript/JavaScript, React, Next.js, Node.js, Express, REST APIs, PostgreSQL, Drizzle ORM, MongoDB, Mongoose, HTML5, CSS, Tailwind CSS

AI & Model Workflows: OpenAI API, Gemini API, Mistral AI, LangChain, RAG, embeddings, vector search, prompt engineering, LLM evaluation, Codex, Claude Code

Cloud, Data & Tools: Python, SQL, C++, AWS Glue, S3, Lambda, IAM, DynamoDB, PySpark, Pandas, Docker, Docker Compose, Git, Linux, Auth0, SSO, JWT, RBAC
