Education

Bowling Green State University — Bowling Green, OH
M.S. in Computer Science, GPA: 4.00/4.00 — *Aug. 2024 - Aug. 2026*

Bowling Green State University — Bowling Green, OH
B.S. in Computer Science, GPA: 4.00/4.00 — *Jan. 2021 - Apr. 2024*

Experience

Software Engineer — Jul. 2026 - Present
Actual Reality Technologies — *Perrysburg, OH*

- Deployed an enterprise LiteLLM model gateway centralizing LLM access across staging and production, implementing multi-tier fallback routing, Langfuse observability, and 44 automated red-team security fixtures.
- Built an automated evaluation pipeline with Node.js and Playwright to validate multi-turn LLM reasoning, tool execution, and citation accuracy across 41+ regression test suites.
- Architected a production client portal using Next.js 15, React 19, and Firebase, implementing multi-tenant session isolation, automated ticket triage, and real-time client retainer tracking.

Artificial Intelligence & Computer Science Intern — May 2026 - Jul. 2026
SmartSolve Industries — *Bowling Green, OH*

- Engineered domain-specific AI automation agents for enterprise workflows, benchmarking tooling viability and delivering production implementation roadmaps adopted by executive leadership.
- Architected a full-stack employee onboarding system with Next.js, TypeScript, PostgreSQL, and Drizzle ORM, implementing SSO authentication and RBAC middleware to streamline cross-department handoffs.
- Built containerized developer environments with Docker for WSL2 and macOS, standardizing local AI toolchains and eliminating environment discrepancies across team workstations.

Data Engineering Intern — May 2025 - Aug. 2025
American Association of Insurance Services — *Lisle, IL*

- Engineered automated ETL pipelines using Python, PySpark, and AWS Glue, processing 20+ TB of production insurance transaction data across 700+ member companies for executive billing reporting.
- Led data profiling and schema migration across 160+ tables in MySQL, Oracle, and Impala using Python and SQL, standardizing disparate legacy records into 25 unified master-data domains.
- Modernized 160+ legacy Pentaho ETL jobs into serverless AWS Glue workflows and partitioned S3 data lakes, consolidating pipeline complexity and guaranteeing 24-hour SLA data freshness.

Software Engineering Intern — May 2023 - May 2024
American Association of Insurance Services — *Lisle, IL*

- Automated schema generation with Python to produce 1,000+ production SQL tables and analytical views across 10+ insurance lines, accelerating industry openIDL data standardization.
- Implemented role-based access control (RBAC) and JWT authentication in a React/Node.js web application, securing sensitive data access across 110 enterprise users.

Software Engineering Intern — May 2022 - Aug. 2022
Alliance for Paired Kidney Donation — *Toledo, OH*

- Hardened AWS-hosted clinical match-run systems by implementing CSRF protection, IP-based audit logging, and input validation, eliminating runtime exceptions for organ transplant coordination.

Projects

HealthTrend - Healthcare Streaming Pipeline — Docker, Apache NiFi, Kafka, HDFS, Spark, PySpark

- Built a Dockerized healthcare data pipeline routing patient records into HDFS, streaming events through Kafka, and aggregating analytics with Spark and PySpark.

Diff-Grounded PR Description Generation — Python, OpenAI API, GitHub API

- Engineered an LLM summarization pipeline (Python, OpenAI API) accepted at IEEE ICSME, synthesizing code diffs and repository metadata into structured PR descriptions across 1,450 pull requests.

Technical Skills

Languages & Frameworks: Python, TypeScript/JavaScript, Swift, SQL, Java, C++, C, React, Next.js, Angular, Node.js, Express, REST APIs, Firebase

AI, Data & Cloud: LiteLLM, AI/model gateways, Model Context Protocol (MCP), guardrails, Langfuse, OpenAI API, Gemini API, Mistral AI, LangChain, RAG, LLM evaluation, PostgreSQL, MySQL, MongoDB, AWS Glue, S3, Lambda, IAM, DynamoDB, PySpark, Kafka, NiFi, Docker

Security, Testing & DevOps: Vercel, Vitest, Jest, Playwright, Testing Library, Docker, Git, GitHub Actions, Linux, SSO, JWT, RBAC, Auth0, CSRF protection, audit logging, PII tokenization, Codex, Claude Code, Scrum/Agile

Domains: Insurance data systems, Healthcare workflow software, Consumer data products, Applied AI/ML systems, Systems programming
